

CI 103  
Computing and Informatics  
Design III  
Week 7

# Agenda

- Announcements
- Final Presentation Requirements
- Lab Instructions
- Homework

# Announcements

Quiz 2 will be administered at the end of the Week 7 lab covering material from weeks 4, 5 and 6

# Final Presentation

- Week 10 – No lecture or lab meetings
- Team Presentation on Video
- Everyone speaks!
- 10 minutes – hard limit, practice
- 120 points, about the weight of a final
- Anyone can watch your presentation

# What's Included

- Introduce the team, Pitch
- Demonstrate your product, show code off
- Discuss your process
- Major take-aways – what you learned (as a team and as individuals)
- Plans for the Future (if any)
- Thank you and questions/feedback

# Introductions

- Introduce the team
  - With full names, positions on the team and a visual (headshot, or actual person)
  - No self introductions (except the Product Owner), the product owner introduces everyone
  - ✓ – “Bill Smith is a developer; he’s been working primarily on the database.”
  - ✗ – “This is Bill.”

# The Pitch

- One member of the team delivers the pitch
- Your pitch should be about 30 seconds +/- 3 seconds (10%)
- This is public speaking
  - All rules for public speaking apply
  - Do: project your voice, have confidence, be enthusiastic, make eye contact
  - Don't: fidget, **read it**, uhmmm or like

# Scoring Introductions & Pitch

- Team score
- 10 points
  - + 2 using full names with roles
  - + 2 having visual of each person
  - + 2 speaker is interesting (word choice, tone, delivery) is persuasive
  - + 2 is descriptive of the product
  - + 2 clear voice
  - Penalty 30 seconds +/- 10%

# The Demo

- We want to see a live demo
- If an app, consider using an emulator or having a QR code that viewers can use to download it and play along
- Videos of someone using a mobile app rarely work out well
- Think carefully about how to transition from your slides to your demo and back

# The Demo

- Crap happens – but shouldn't make it to the video!
- Be ready to try again if anything goes wrong in your demo
- This presentation is unlikely to be done in one continuous take 😊
- Don't leave *anything* to the last minute!

# The Demo

- NOT based on User Stories (this is NOT a Sprint Review!)
- Demonstrate the core functionality of your product as if to potential customers
- Be user-centric
- If there are admin features, demonstrate them separately
- Don't talk about the future, only what is right in front of us

# Scoring the Demo

- Team score
- 20 points
  - + 5 “live” demo (not screenshots)
  - + 5 product functions as intended
  - + 5 speaker(s) focused on features
  - + 5 clear voice(s)

# The Technical Demo

- Each member of the team must be able to share one piece of code they wrote
  - Show the source code
  - Turn off dark mode, it doesn't work well in a video. Also, increase font size
  - Highlight something you learned or something that was tricky for you
  - Okay to talk algorithms here, consider your viewers to be other developers

# Scoring the Technical Demo

- Individual Score
- 20 points
  - + 5 Source code is clear and easy to read on video (no dark mode, larger font)
  - + 5 speaker focused on development
  - + 5 speaker explained code shown
  - + 5 clear voice
  - Penalty – shows multiple files or algorithms, shows code not their own

# The Team's Process

- After seeing WHAT was accomplished, we want to know HOW it was done
  - How did the team coordinate work?
  - What products did the team use?
  - What did the team measure?
  - How did the team use those measurements?

# Scoring Process

- Team score
- 10 points
  - + 3 addressed teamwork
  - + 2 products used and how they contributed
  - + 3 measures taken and how they were used (team metrics)
  - + 2 clear voice(s)

# Major Takeaways

- What did you learn?
  - About teamwork (coordinate so everyone isn't saying the same thing)
  - As an individual (one soft skill, one hard (tech) skill)
- What was hard?
- What will you remember forever?

# Scoring Takeaways

- Individual score
- 10 points
  - + 3 addressed team-based learning
  - + 5 substantive individual learning
  - + 2 clear voice(s)

# Future Plans

- What does the team plan on doing with the product after CI103?
- Be brief, but descriptive
- “Sell” us on the next step in your vision
- This needs to be a discrete part of the presentation, not folded into the demo

# Thank you

- Remember to thank the audience at the end of your presentation

# Scoring Conclusion

- Team score
- 5 points
  - + 1 plans for future discussed here and no where else in presentation
  - + 3 'Thank you' and attributions provided
  - + 1 clear voice(s)

# Submitting the Presentation

- One member of the team will submit the video presentation to the Final Presentations Discussion Board using the Drexel Streams link
- Create a new topic for your team's video using your BBL Group ID
  - Ex. 60-03 Fun/Witty Team Name
- Make sure the video and sound work, tested by others in the team

# Questions/Feedback

- Each individual needs to watch 10 other presentations and provide feedback (these will be assigned to you)
- Feedback will be replies to the original video post on the discussion board
- Ask at least one substantive question
- Provide at least one feedback statement
- This is part of YOUR presentation grade!

# Scoring Questions You Ask

- Individual score
- 10 points [10 / 5 / 0]
  - Watched the 10 teams you were assigned
  - Replied in thread with at least one feedback statement that the team could find useful
  - Replied in thread with at least one substantive question (not a yes/no type) based on the presentation

# Responding to Questions

- Feedback, which will include questions, will be done on BBL.
- Each team member needs to be able to ***answer*** questions posted on the discussion board.
- This is part of YOUR presentation score!
- Each team should have more than 35 questions to answer.

# Scoring Your Answers

- Individual score
- 10 points [10 / 8 / 5 / 0]
  - ✓ Replied in thread with substantive responses (not a yes/no or thanks) to at least 8 but preferably 10 questions and feedback
  - ✓ 10 good answers = 10 pts
  - ✓ 8 good answers = 8 pts
  - ✓ <8 and /or weak, minimal answers = 5
  - ✓ Did not do it? You get a 0

# Timeline

Team produces a Script (Due 2/23)

Practice the presentation

Record and submit the final 10 min.  
presentation (Due 3/10)

Watch 10 assigned teams' presentations and  
provide feedback and questions (Due 3/13)

Respond to 8-10 questions on your project  
(Due 3/16)

# Questions?

Give the attendance Quiz now

# Lab 7

- Your Scrum Master will facilitate a Stand-Up meeting
- If you have not already planned your final sprint, do so in this lab
- Work on your final presentation is NOT included in your Activity Report

# Week 7 Homework

- Team creates an outline for the final presentation
- Each person writes a reflection on teamwork

# Presentation Outline

- Team homework due 2/23!
- Collaboratively create an outline for your presentation using an AV planning template

| # | Visual          | Audio                                 |
|---|-----------------|---------------------------------------|
| 1 | Team name       | We are team x ...                     |
| 2 | Pat's head shot | I am Pat Smith, the Product Owner ... |

- One member of the team will submit on BBL as Week 7 homework

# Presentation Outline

- Your outline does not have to be a word for word script
- It should be clear who is talking about each topic
- It should be clear that your team is planning to include all the required parts
- It should be clear that everyone on the team contributed

# Optional but Useful

- The following link is to an article on presenting software to a non-technical audience
- <https://codingwithempathy.com/2016/03/08/presenting-software-to-non-technical-users-8-ways-to-make-your-product-demo-shine/>

# Questions?
